TERRAPIN X
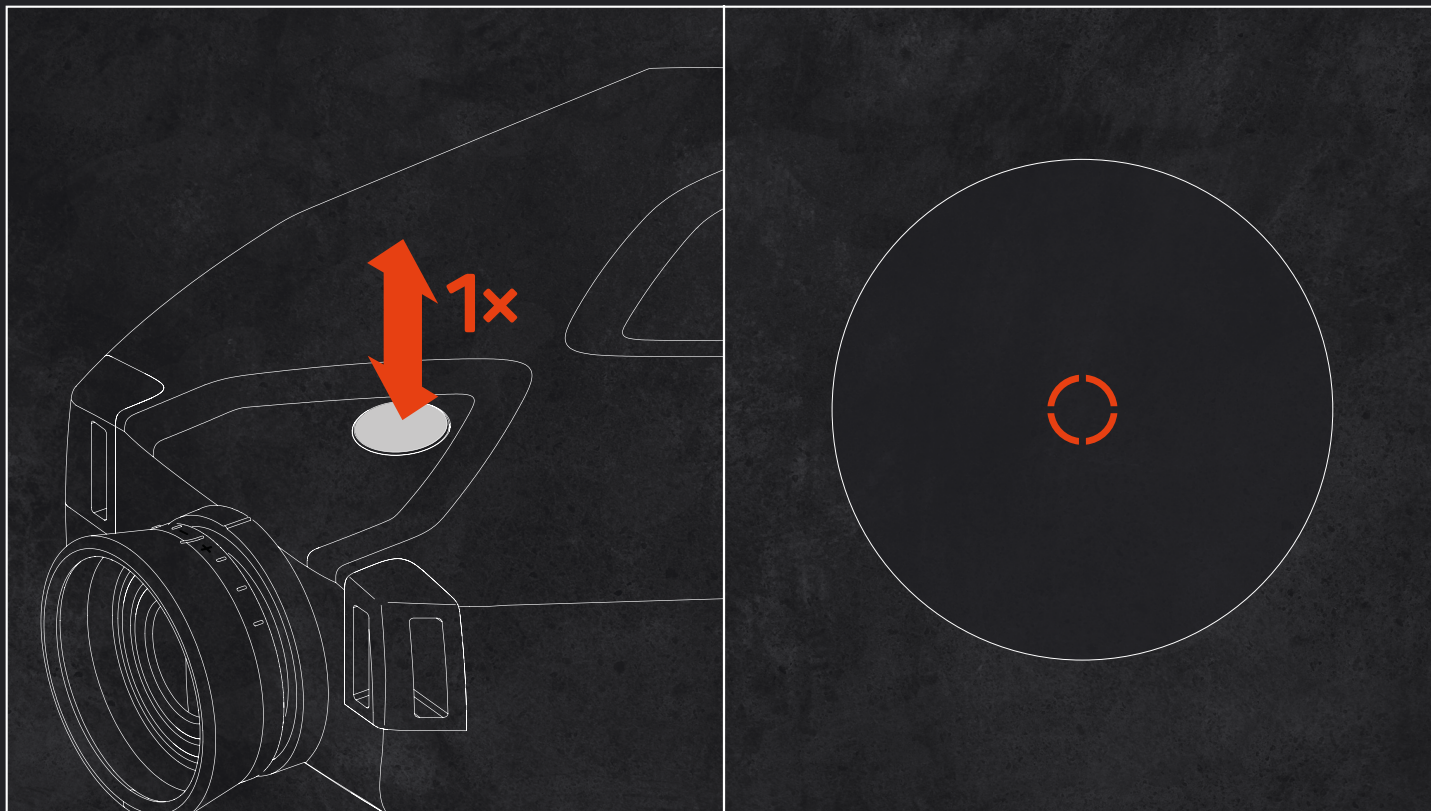

CONNECTING

your TERRAPIN X to the Strelok Pro ballistic app

- By pressing and releasing the push button of your TERRAPIN X you turn on the device
- You will now see the digital aiming reticle in the display of your TERRAPIN X

- Press and release the push button of your TERRAPIN X three times in quick succession to enter the Bluetooth menu
- In the display you will see the last saved setting. This can either be "OFF", "APP", "hESt" (for KESTREL) or "tdH"
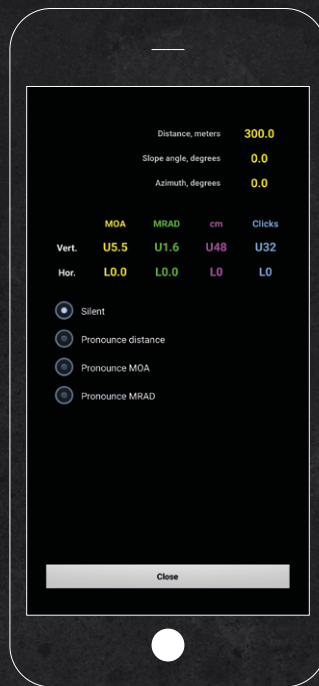

- Toggle through the options by pressing and releasing the push button of your TERRAPIN X until you reach "tdH"

- Confirm this setting by pressing and releasing the push button three times in quick succession
- As confirmation four dashes ("----") will appear in the display of your TERRAPIN X
- Besides the electronic aiming reticle you will now also see a flashing Bluetooth symbol in the display of your TERRAPIN X. This signifies that the TERRAPIN X has entered the pairing mode

- Make sure that Bluetooth is enabled in the general settings of your smartphone
- For iOS devices also allow access to Bluetooth in Settings > Privacy > Bluetooth
- Open the Strelok Pro ballistic app on your smartphone and enter the home screen of the app
- In the lower part of the screen click on the TERRAPIN X symbol

- The Strelok Pro app will search for your TERRAPIN X and connect to it

When a connection is established, the TERRAPIN X transmits range, azimuth and elevation to the Strelok Pro ballistic app. Using this data, the Strelok Pro ballistic app calculates an accurate firing solution.
